

EDITORIAL POLICY AND GENERAL INFORMATION

ACTA ICHTHYOLOGICA ET PISCATORIA (AI&P) is an international, peer-reviewed scientific journal that publishes articles based on original experimental data or experimental methods, or new analyses of already existing data, in any aspect of ichthyology and fisheries (fin-fish only). We encourage specialists in all areas of ichthyology and fisheries, even apparently distant ones such as fish diseases and parasitology, aquaculture nutrition, or seafood science (etc.) to submit their manuscripts. AI&P is issued two times a year on paper and in electronic form at <http://www.aiep.pl> (the journal is primary paper).

It is expected that investigators running experiments on live fish and intending to publish their results in AI&P, will have obtained an approval of a local ethic committee for scientific experiments on animals or any other local animal care committee.

All authors listed on a manuscript must agree to its submission. We assume that the corresponding author on the letter of submission signifies that these conditions have been fulfilled.

Review process. Advancement of fisheries science is the major requirement in the evaluation process of AI&P. Preliminary suitability of manuscripts is determined by editors or members of the Editorial Advisory Board and submissions with insufficient priority are rejected promptly. Manuscripts not prepared in the advised style will be sent back to authors without scientific review. All other submissions are registered and the authors are notified (by e-mail) with the reference number, which **must be quoted** in subsequent correspondence. The registered manuscripts are sent to independent experts for scientific evaluation. Submitted papers can be accepted only after receiving positive opinions of reviewers.

Conflict of interests. Authors of research articles evaluating or examining commercial products (e.g. fish feeds, anaesthetics, drugs, vaccines, etc.) should disclose to the editor, at the time of submission, any financial arrangement they may have with a manufacturer of such product or with a company making a competing product. It is expected that: 1) authors of such articles will not have any financial interest in a company (or its competitor) that makes a product discussed in the article; or 2) such arrangements will be in a clear form communicated to the reader.

All persons involved in the evaluation process (reviewers, members of the Editorial Advisory Board, editors) must report to the Editor-in-Chief any conflict of interest with regard to a manuscript under review or commercial companies involved with a product under study.

Permissions. Any material borrowed from other sources must be accompanied by a written statement from both author and publisher giving permission to AI&P for reproduction. It is assumed that authors citing papers still in press, unpublished data, and/or personal communications have obtained permission from all persons involved.

Copyright transfer. Upon acceptance of manuscripts, the authors convey, and otherwise transfer all rights, title, interest, and copyright ownership in said work to the Wydawnictwo Naukowe Akademii Rolniczej w Szczecinie (WNARS) (publisher of AI&P). Consequently, any material from published (or accepted) articles cannot be published without the prior written permission of the WNARS.

Disclaimer. The data and opinions appearing in the articles and advertisements herein are the responsibility of the author. Accordingly, the Publisher and the Editor accept no liability whatsoever for the consequences of any such inaccurate or misleading data, opinion, or statement.

Printing costs and reprints. The publishing costs of the AI&P are covered by the WNARS. The authors do not pay per-page charges. The only exception is the costs of colour pages (in 2004 a two-page colour insertion cost price was 600 PLN (=200 USD)). The authors obtain 25 reprints free of charge and a free PDF file can be downloaded from our web page. Additional copies of paper reprints may be ordered at cost price. Recent interpretation of the Polish taxation law treats free reprints as taxable income. Therefore Polish residents before receiving reprints should pay small tax to the Publisher (WNARS). Residents of countries, which signed with Poland an agreement on avoidance of double taxation (some 80 countries) do not pay tax in Poland, but must report this income in their annual tax return in their respective countries. See list of agreements on: <http://www.mofnet.gov.pl/dokument.php?dzial=150&id=9741>.

PREPARATION OF MANUSCRIPTS

Manuscripts. Papers written in English, clearly and concisely, should be typed in double spacing, on one side of the paper, with a margin of 4 cm on the left hand side. **Original and two copies** should be submitted (plus a diskette or a CD). Manuscripts should be sent to the following address:

Acta Ichthyologica et Piscatoria, Editorial Office,

(c/o WNoZiR – Akademia Rolnicza),

ul. Kazimierza Królewicza 4, 71-550 Szczecin, POLAND

Authors are **encouraged to submit electronically** (editor@aiep.pl). Preferable formats are .doc or .pdf. The size of attached illustrations must permit their further distribution to reviewers. Manuscripts submitted electronically (and diskettes send along paper copies) should be arranged in a way facilitating their transfer to reviewers and the evaluation process itself (figures and tables inserted in the text – preferably in PDF format). Submitted MSs, on the contrary, should have all illustrations saved as separate files.

The text. The manuscript should be arranged according to the following pattern: **title** (please use capital letters only when needed), **names** of authors (with first names spelled out, middle names as initial, and last name CAPITALIZED), **affiliations** of all authors, up to **8 key words**, detailed mailing **address** of the corresponding author with the phone and fax numbers, and e-mail address, **running title**, **structured summary**, **Introduction**, **Materials and methods**, **Results**, **Discussion**, **Conclusions** (only if needed), **Acknowledgements**, **References**, **tables**, **figures** (source files are needed for graphs), **figure captions** (including full legend describing the figure and explaining all the symbols used). An excess of headings and subheadings should be avoided. Generic and specific names should be set in italics. Names of the higher taxa should not be underlined nor italicised. Any issue not covered by the present instruction should be resolved based on "The scientific style and format". The CBE Manual for Authors, Editors, and Publishers. Sixth Edition 1994, Cambridge University Press. All fish names must be consistent with the FishBase <http://www.fishbase.org>

A **summary** should be divided into small chapters: **Background** (why the study was initiated, why this type of study is needed, and what is the aim of the present paper), **Material and Methods**, **Results**, principal **Conclusion** (with a closing remark—what is the importance of the presently reported findings). While writing the abstract please keep in mind that it may be also reprinted separately by abstracting/indexing journals or databases.

Tables must be self-explanatory, typed on separate sheets, numbered consecutively and carry an appropriate title. Tables should contain synthesized (not primary) data and not exceed A4 size.

Figures. Only well reproducible figures are requested: a) photographs black-and-white and clear; b) drawings on card or parchment papers in Indian ink; c) high-quality computer-generated line diagrams, or glossy prints. Excessive illustrative material should be avoided. Colour figures will be printed on author's expense and therefore any colour pictures should be arranged in plates fitting into the page size of AI&P. Submitted manuscripts should have illustrations saved in a format taking up little space, while the accepted manuscripts must include plates saved in .tif format (resolution 300 dpi).

References in the text should be quoted by the authors name and date (in parentheses). When the author's name is cited in parentheses please do not separate the name and year with comma. If there are more than two authors, only first one should be named, followed by "et al." The reference list at the end of paper should follow the examples shown below:

Ghosh K., Sen S.K., Ray A.K., 2002. Growth and survival of rohu, *Labeo rohita* (Hamilton) spawn, fed diets supplemented with fish intestinal microflora. *Acta Ichthyologica et Piscatoria* **32** (1): 83–92.

Kabata Z., 1979. Parasitic Copepoda of British fishes. *The Ray Society, London*.

Wierzbicka J., 1964. Występowanie *Asymphyldora imitans* (Mühling, 1898) w Wiśle. [Occurrence of *Asymphyldora imitans* (Mühling, 1898) in the Vistula River.] *Wiadomości Parazytologiczne* **10** (4–5): 525–526. (In Polish.)

Berland B., 1993. Salmon lice on wild salmon (*Salmo salar* L.) in western Norway. pp. 179–187. *In: Boxshall G.A., Defaye D., (eds.) Pathogens of wild and farmed fish, sea lice.* Ellis Horwood, New York, London, Toronto, Sydney, Tokyo, Singapore.

Please note that, full journal titles should be listed. All references in the list should be indicated at some point in the text and vice versa. References should be limited to a minimum. Unpublished data or private communications should be avoided and they can only be mentioned in the text. Please limit the number of cited conference abstracts, textbooks, BSc or MSc theses etc. The titles of papers published in languages other than English, French, German, or Spanish should be accompanied by their English translation [in brackets] and their original language should be stated (in brackets). Slavonic names, paper titles, and journal titles, originally written in Cyrillic alphabet should be transliterated (not transcribed) following the ISO-86 system (Commonly used the Library of Congress System is in fact a national transcription system and as such cannot be accepted).

Abbreviations and symbols. Quantities should be expressed in SI units, although usage of units such as μ l or l for liquids is acceptable (and suggested). All abbreviations should be spelled out when first used in the text.
